INVESTMENT ADVISORY SERVICES

MONTHLY UPDATE - September 2026

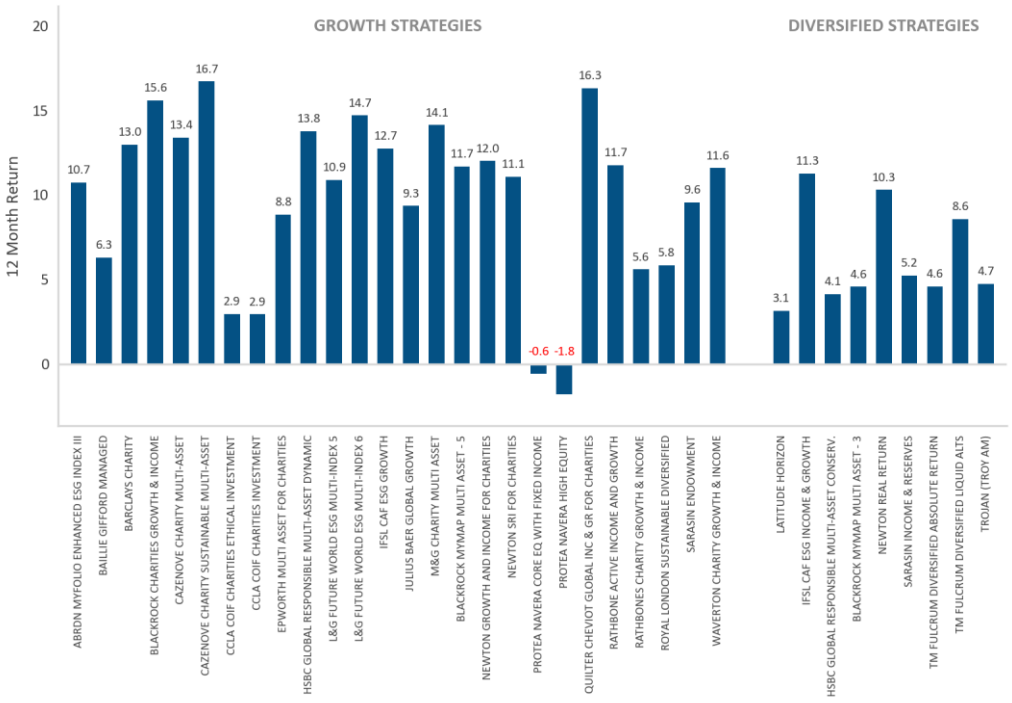

This update includes monthly performance and risk data for a range of multi-asset funds to provide market context to charity management teams and trustees as they review and evaluate their investment portfolios. This list includes funds that are commonly used by charity investors and does not reflect our views or recommendations on any of these funds or investment managers.

5 YEAR RETURN FOR MULTI ASSET FUNDS

Source: Morningstar Direct to 30.09.2026 net total returns in GBP. 70% Global Equity/30% UK Short dated gilts is a monthly rebalanced index of the FTSE World and FTA UK gilt up to 5 yr indices in GBP.
Returns for multi-asset funds are shown as a median for funds with performance data available for at least 5 years.

12 MONTH TRAILING RETURNS

Source: Morningstar Direct to 30.09.2026.

DEFINITIONS

STANDARD DEVIATION (ANNUALISED)	Standard Deviation is a statistical measurement of risk that reflects dispersion around an average. This depicts how widely the returns varied over a certain period of time.
SHARPE RATIO	The Sharpe ratio (also known as reward-to-volatility-ratio) is a measure of the return achieved above the risk-free rate per unit of risk undertaken. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.
UPSIDE CAPTURE RATIO	Upside Capture Ratio measures a manager's performance in up markets relative to the FTSE World Index. It is calculated by taking the fund's upside capture return and dividing it by the index's upside capture return.
ESG RISK SCORE	Morningstar Sustainalytics' ESG Risk Ratings provides a multi-dimensional assessment of a company's exposure to industry-specific material ESG risks and its management of those risks. Risk Scores are displayed as a number between 0 and 100, though most scores range between 0 and 25. Lower Risk Score means lower underlying ESG risks.
PRODUCT INVOLVEMENT	The Morningstar Portfolio Product Involvement metrics measure a portfolio's exposure to involvement in a range of products, services, and business activities. The metrics are holdings-based calculations that use company-level analytics from Sustainalytics, a leading ESG research provider. Further information can be found on this website. https://www.morningstar.com/content/dam/marketing/shared/research/methodology/812380_PortofioProductInvolvement.pdf
FOSSIL FUEL INVOLVEMENT	The percentage of the fund's long-only assets that are exposed to corporations that make any revenue (>0%) from fossil fuels. Companies involved in fossil-fuels may derive revenue from one or more of the following activities: thermal coal extraction, thermal coal power generation, oil and gas production, oil and gas power generation, and oil and gas products and services.
